ABOUT ME

I'm a cybersecurity enthusiast with hands-on skills in secure coding using Python, C++, Java, HTML, CSS, and SQL. I'm comfortable working with operating systems like Linux and Windows Server, and I enjoy solving complex technical challenges. My experience with security tools—including Kali Linux—supports my mission to build safe, reliable systems that resist cyber threats.

SKILLS

- Secure Coding (e.g., Python, C++, Java, HTML, CSS ,SQL)
- Operating Systems: Linux, Windows Server
- Problem Solving
- Security Tools : kali Linux ,etc

CERTIFICATION

- Web Development
- Hackathon
- Introduction to Cyber Security
- Introduction to C++
- Acquiring Data by Fortinate
- Mongo DB
- Python for Beginners

WORK HISTORY

Hackathon Participant
Institute Problem-Solving Hackathon
March 2024 - Pune, Maharashtra

- Tackled real-world cybersecurity challenges through analytical thinking and strategic planning
- Worked in a team of 4 to develop a solution for detecting anomalies in network traffic
- Applied logical reasoning and basic scripting to simulate potential threat scenarios
- Presented a working model and rationale to judges, receiving praise for clarity and innovation

EDUCATIONAL BACKGROUND

- Bachelor of Technology (B.Tech) in Cybersecurity
- Sanjivani University, Kopargoan
- Currently in 2nd year; expected graduation: 2028
- (Current GPA: 6.8 / 10
